

VAAGDEVI PHARMACY COLLEGE

Approved by AICTE, PCI-New Delhi & Affiliated to JNTUH P.O.BOLLIKUNTA, WARANGAL-506 005 (TELANGANA STATE)

The Institution has facilities for alternate sources of Energy and Energy Conservation Measures

1. Solar panels

• Solar panels are placed on the buildings for the use of renewable energy. Solar technology is used to perform energy conservation measures at our institution. Energy providers and utilities generate electricity on a vast scale to power the campus using solar photovoltaic and concentrating solar power technologies. To conserve energy, our management has used the following alternative sources. To combat climate change, solar photovoltaic systems are installed on our premises. A solar PV system is linked to the main electrical grid to enable power produced by solar panels.

| S.No | Description | No.Of Items |
|------|------------------------|-------------|
| 1 | No of Solar Panels | 307 |
| 2 | No of Inverters | 3 |
| | Rating of Inverter | 33KVA |
| 3 | Capacity of Each panel | 325W |
| 3 | Capacity of the plant | 100KW |

Annual power generated by renewable energy sources

| S.No | Year | Total power requirement | Total Solar Energy supplied to the Grid KW | | |
|------|-----------|-------------------------|---|--|--|
| 1 | 2020-2021 | 649880 | 190543 | | |

5. Usage of LED BULBS/Power Efficient Equipment

Where consumption is higher, such as in the principal's chamber, laboratories, and staff rooms, LED-based energy conservation was implemented. occupancy LED lights indicate indoor activity at a specific location. By shutting off the lights as soon as the last person leaves the room, they both offer convenience and conserve energy. The placement of the occupancy LED must ensure that they can detect occupant activity across the whole building.

One benefit of having more daylight throughout the daytime in our institute's buildings is that it maximises visual comfort or uses less energy.
